Mustard and products thereof	Not contained	
Sesame seeds and products thereof	Not contained	
Lupine and products thereof	Not contained	
Molluscs and products thereof	Not contained	
Sulphite at concentrations of at least 10 mg/kg	Not contained	

Calculated content of gluten:

Gluten	Not contained	
--------	---------------	--

Regulation 828/2014 (EU) defines the following gluten labelling for finished food:

≤ 20 ppm: gluten-free

> 20 ppm - ≤ 100 ppm: very low gluten

The dosage of our product in finished food needs therefore to be taken into account accordingly.

We have carefully investigated potential cross-contamination of allergenic materials in the manufacture of our products. We have identified and documented the materials that we use that may be derived from potential allergens.

We follow Good Manufacturing Practices for all food and flavouring production sites. For each of our production lines we have cleaning schedules specifically based on the particular properties of our raw materials. It is a normal part of our procedures to thoroughly clean all production lines before producing a different product to prevent cross-contamination. Our supply chain personnel are trained on the proper handling of allergenic materials.

This is a general disclaimer.

Due to the complexity of our products and production methods we cannot totally exclude potential cross contamination in dry blended products depending on the production plant. For further information on this topic please refer to the Allergen Policy of the respective Symrise production plant.

Symrise AG
